Multi Chamber Cleaners

Single Chamber Cleaners

SALIENT FEATURES

Indigenously manufactured with advanced MOSFET / IGBT technology.

Pulse Sweep Power - to obtain maximum cleaning efficiency with lesser dead zones.

Compact, rugged and highly durable systems.

Efficiency of 90% permits maximum cleaning action, low power consumption.

Automatic frequency tuning for maximum output, to avoid any freq. shifting.

Input range of 170VAC - 270 VAC, with Inbuilt Voltage Stabilizer.

Digital 99 min pre-settable timer. Digital Temperature Controller.

Pre-Set Auto Degassing function.

Efficient Sales & Service backup, Competitive rates, One year warranty.

Digital Temperature Controller

Ultrasonic Power Controller - 10% to 100%

State of the Art Pulsation Mode to achieve demanding cleanliness levels.

Non-Standard Dual Chamber and Multi Chamber models for specific requirements.

Material Handling Systems can also be integrated as per requirement.

Multi Frequency Operation (Optional) for cleaning with best results of low and high frequencies to eliminate dead zones completely.
